Colour and Space in Cultural Heritage (COSCH)

COSCH stimulates collaborative research, establishes good practice and simplified uses of high-resolution optical techniques. COSCH research is undertaken by 5 working groups (WG):

- WG 1: Spectral object documentation
- WG 2: Spatial object documentation
- WG 3: Algorithms and procedures
- WG 4: Analysis and restoration of cultural heritage surfaces and objects
- WG 5: Visualisation of cultural heritage objects and its dissemination

Modern technologies offer many possibilities to collect data to shape and appearance of cultural heritage objects. However, what are the best ways to answer typical questions of cultural heritage documentation? Seven case studies launched end of 2014 address different ways of documenting cultural heritage objects:

- Roman coins;
- Germolles' wall paintings;
- Icon of Archangel Gabriel;
- Ancient Greek kantharos;
- White Bastion fortress;
- Romanian cultural heritage;
- Bremer cog.

First outcomes of these case studies will be presented and the interdisciplinary approaches will be discussed.

During the **fourth ESR's Think Tank** we seek to identify

- key concepts for digitising and documenting cultural heritage in Europe
- vocabulary terms related to cultural heritage object documentation.

As a participant you will:

- Present your own work (5 minutes),
- engage with peers from around Europe,
- make your original contribution to the initiative, and
- build your research network.
