Colour and Space in Cultural Heritage (COSCH)

COSCH stimulates collaborative research, establishes good practice and simplified uses of high-resolution optical techniques. COSCH research is undertaken by 5 working groups (WG):

- WG 1: Spectral object documentation
- WG 2: Spatial object documentation
- WG 3: Algorithms and procedures
- WG 4: Analysis and restoration of cultural heritage surfaces and objects
- WG 5: Visualisation of cultural heritage objects and its dissemination

Modern optical technologies offer many new possibilities for recording cultural heritage objects digitally. To what extent can they meet the requirements of comprehensive documentation and support conservation and scholarship?

Seven case studies launched end of 2014 address different ways of documenting cultural heritage objects:

- Roman coins;
- Germolles' wall paintings;
- Ancient Greek Kantharos;
- White Bastion fortress;
- Romanian cultural heritage;
- Bremer "cog".

During the meeting the most recent outcomes of these case studies will be presented focusing on the needs of end-users and interdisciplinary approaches will be discussed.

The topic of the **fifth ECI's Think Tank** is Imaging CH. We seek to identify questions and issues arising from the individual preparation work -- from the end-user perspective.

As a participant you will:

- engage with peers from around Europe,
- make your original contribution to the Action, and
- build your research network.
